## PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to Mike Molitor or to the auctioneer, sales staff or representatives. If you would like to discuss the sale offering, call us (preferably several days before the sale), and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and pay only the bid price established by the auction. Bids are handled in confidence with a Satisfaction Guarantee on all orders.

### GENERAL INFORMATION:

**Inspection of Cattle:** All sale cattle will be available for your inspection at the ranch. All cattle are freeze branded.

**DNA Information:** All cattle sell free of known genetic defects. A supplement sheet will be available at the sale for updated performance data. All bulls and females have been HD50K Tested.

**Herd Health:** All cattle will be accompanied with proper health certificates. Cattle selling to surrounding states that require additional tests will be held and shipment will be scheduled later. All bulls will be semen tested and scrotal measured. Also, bulls and breeding-age females will be vaccinated with Preg Guard Gold FP10 and Poured. All cattle have PI negative tests. Safeguard wormer is used twice a year. All yearling cattle have a Feb 2019 treatment with Valbazen wormer.

**Terms and Conditions:** The terms of the sale are cash or check and all settlements must be made at the close of the auction. All animals are 100% guaranteed in accordance with the rules and regulations set forth by the American Angus Association. A copy of the Angus Association rules will be in the office on sale day. Announcements on sale day take precedence over printed material. All persons who attend the sale do so at their own risk. Molitor Angus assumes no responsibility, legal or otherwise, for their safety or the behavior of the animals.

**Insurance:** Insurance will be available at the purchaser's option.

**Delivery:** Pick up your purchased livestock by Saturday, March 23, 2019 and enjoy a \$50.00 gift certificate per head to the Lumber Yard Steakhouse in Zenda, KS. For more details, see page 33. We will be happy to assist the delivery arrangements. We do offer free delivery of 3 or more lots to one location within 300 miles. Shipment is at buyer's own risk, so we suggest you insure your purchases.

**Lunch:** A complimentary lunch will be served at 11:00 a.m.

**All announcements from the Auction Box will take precedence over the information in the Sale Book. PLEASE BRING THIS CATALOG WITH YOU TO THE SALE.**

## EXPLANATION OF PERFORMANCE CODES

(See page 9 for understanding performance ratios.)

**CED** – Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating a greater calving ease in first-calf heifers.

**BR** – Birth Weight Ratio. 100 is average.

**BW** – Actual Birth Weight in Pounds.

**205 Wt.** – Weaning Weight adjusted to a 205 day value.

**WR** – Weaning Weight Ratio comparing all animals weaned in a contemporary group. 100 is average.

**YR** – Yearling Weight Ratio comparing all animals in a contemporary group. 100 is average.

**YW** – 365-day adj. yearling weight in pounds.

**NR** – Nursing Ratio – weaning ratio average of the dam's progeny.

**\$(B)** – Beef Value in dollars.

**365 Wt.** – Adjusted weight in pounds at 1 year of age.

**Weaning Wt. EPD** – the number of pounds at weaning that the bull should add to a calf crop above the breed standard. (WW)

**Yearling Wt. EPD** – the number of pounds at yearling that the bull should add to a calf crop above the breed standard. (YW)

**Pure Milk EPD** – the number of pounds at weaning that should be attributed to the milking ability of a bull's daughter. (Milk)

**Birth Wt. EPD (expressed in pounds) (BW)** –

a. Bulls with EPDs less than +2.0 are recommended for use on heifers.

You may still have some calving difficulty, but as the value for EPD becomes lower, so should your calving difficulty due to birth weight become less.

b. Bulls with EPDs between +2.0 and +4.0 can be used on heifers, but close supervision and management should be followed.

c. Bulls with EPDs over +4.0 can safely be used on cows, but are not recommended for use on heifers.

# - This symbol used within a pedigree means that that particular animal is a Pathfinder and meets a certain set of strict standards set forth by the American Angus Association.

The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early performance of the offspring. In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

# WELCOME TO MOLITOR ANGUS RANCH

## MOLITOR ANGUS RANCH

11558 SW 90th St. Zenda, Kansas 67159  
(620) 243-6335 • Email: molangus@onlinezenda.net  
Mobile: (620) 243-3081

Dear Angus Friends,

Welcome to our 40th Annual Production Sale. This family operation continues on the mission to "raise trouble free cattle that calve easily and produce a big calf". We are making progress towards this goal as our sale cattle rank in the top 25% of the breed for calving ease traits and top 20% for Growth EPDs.

Our family ranch is a "hands on" operation and all the sale cattle have been raised and grown on our land. The day to day feeding of our cattle allows us to monitor their development from birth to sale day.

For the bulls, our feeding system gives them the opportunity to compete against each other and exhibit their superior gain potential. Past customers indicate their satisfaction with the condition and soundness of our sale bulls.

The bulls selling have done well on the ranch this winter and will have average actual weights of over 1250 pounds on sale day. All bulls are semen checked and are ready for service.

The yearling females selling have the same bloodlines as our replacement heifers and represent similar sire groups as the bulls in the sale.

We hope you appreciate the entire offering represented in this sale. Be confident that you are buying cattle that are fully guaranteed by a program that has 67 years of experience in the Angus business.

Let us know if we can be of assistance in helping you with your selection. We greatly appreciate your interest in our family cattle operation. We are appreciative of all the support of our loyal customers and look forward to seeing everyone on sale day to celebrate our 67th year.

## 40TH ANNUAL PRODUCTION SALE!

Dear Cattlemen,

Plan now to join the Molitor family as we celebrate the 40th Annual Production Sale. Selling will be 110 bulls and 40 yearling heifers. Featured sires will include HA Cowboy Up 5405, S Whitlock 179, Baldrige Compass C041, Ellingson Chaps 4095, HA Outside 3878, Molitor Payweight 3015-165, Basin Advance 3134, DAR Pay Upgrade Q807, Molitor KG Solution 9736-574, HARB Playboy 581 JH, SVF Calvary B323, ICC Pay Raise 4886 and much more.

The Molitor family has been breeding quality Angus cattle for 67 years since 1952. In 2014 they were recognized as the Certified Angus Beef Seedstock Commitment to Excellence Award Winner. The cattle excel in a combination of performance, calving ease with gentle dispositions.

Plan now to be on hand sale day to celebrate the lengthy tradition of the Molitor Program. Please don't hesitate to call on us at the American Angus Hall of Fame if we can be of assistance in any way.

Sincerely

Tom Burke

# PERFORMANCE DATA AS AN AID IN LIVESTOCK SELECTION...

Molitor Angus is dedicated to providing honest and accurate performance data to their customers. All of the EPDs listed in this catalog are official American Angus Association EPDs calculated by Angus Herd Improvement Records (AHIR) and are

current as of the date of this catalog printing. Scrotal measurements will be on the performance update sheet available sale day.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs. Better characterization of genetics for difficult-to-measure performance traits such as carcass traits, maternal traits and feed efficiency.

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered through weekly evaluation at [www.angus.org](http://www.angus.org).

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Calving Ease Maternal	18
Weaning Weight	26	Mature Weight	11
Yearling Weight	21	Mature Height	8
Dry Matter Intake	8	Carcass Weight	9
Scrotal Circumference	13	Yearling Height	11
Docity	10	Carcass Marbling	9
Heifer Pregnancy	14	Carcass Ribeye	12
		Carcass Fat	10

[www.angus.org](http://www.angus.org)

## GUARANTEED

In addition to the below stated guarantee, all cattle sell under the Suggested Sale Terms and Conditions of the American Angus Association.

### BULLS:

1. All bulls selling are guaranteed to be breeders for the first breeding season.  
Breeding season is defined as the 90-day period following the first turnout of the bulls. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm/ranch of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to a 6 month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of 6 months the seller is unable to prove that the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement.
2. This breeding guarantee on the bulls by the seller will apply with the exception of: (a) injury or disease occurring after the sale, (b) gross negligence or willful misconduct on the part of the buyer.
3. However, all bulls selling for \$3,500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. Breeding injury is defined as injury to penis or preputial tear with inability to extend. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull, less \$10 per day the bull has been in use since first turnout.  
Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Guarantee ends August 31, 2019.

### FEMALES:

1. All yearling females sell as open and ready to breed.
2. Fall calving females are safe in calf unless otherwise noted on sale day.
3. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to six months trial following the return of the animals in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value, or if the buyer prefers, credit toward one female will be given in the following year's sale.
4. All claims for adjustment or refund on the females must be made by December 15, 2019. Mortality insurance on the cattle will be available at the settlement table on sale day.

### What is an EPD?

The Expected Progeny Difference (EPD) is the increase or decrease in performance for a given trait that you can expect from the progeny of an animal compared to breed average. EPDs are expressed in pounds as a plus (+) or minus (-) figure.

### What makes EPDs so valuable?

EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within-herd ratios of contemporary progeny groups. They also factor out the management and environmental differences that may exist between herds. EPDs can accurately be used to compare bulls in different herds within the breed. It is important to select for EPD traits that match your operational goals. If you are looking for a bull to use on virgin heifers, birth weight EPD is a primary consideration. If you keep or sell replacement heifers, milk EPD is a major factor. If your calves are sold at weaning time with no replacement females retained, then weaning EPD is of vital importance. Those of you who background your calves should concentrate on yearling weight EPD. Many times a balance in all traits is required, depending on your individual situation.

It is important to understand that EPDs are accompanied by accuracy values and may fluctuate up or down as accuracy increases.

# SONS OF MOLITOR PAYWEIGHT 3015-165

**Molitor 165 Payweight 488-358 - Lot 1**

- A low birth weight and calving ease EPD bull that has growth EPDs for WW and YW that Rank in the top 10% of the breed.

## CATALOG ORDER

In the sale we are excited to offer several new AI bloodlines, including Ellingson Chaps, Cowboy Up, Whitlock, Baldrige Compass, Pay Raise 4886, and Charlo. Starting the catalog listing this year will be a powerful lineup of bulls by Molitor Payweight 3015-165. Those grandsons of Payweight and KG Solution can be used as an outcross to most pedigrees and can also be used on descendants of Payweight and KG Solution who are proven and genetic defect free sires and dominate the dynamics of the Molitor herd.

- The 3/4 brother to Lot 2 and Ranks in the top 10% for WW and \$B. These sons of Molitor Payweight 3015-165 were our high gaining sire group for our 148 Day Feed Test.

## SALE ORDER

In an effort to provide our customers with an equal opportunity to purchase the same quality bulls from the start of the sale to the finish, we have implemented a unique sale order approach. After a few highlight bulls sell, most of the bulls in this sale will be sold in sire groupings to provide the same quality bulls from the start of the sale to the finish. This will allow our customers who purchase bulls late in the sale an equal opportunity to bid on bulls of the same caliber as in the early portion of the sale, each time a new sire grouping starts. This also assists customers who are trying to select groups of brothers for a more uniform and consistent calf crop. To assist our customers planning their bidding and buying decisions, the sale order for each sire group will be available sale day as well as the order in which the sire groupings will sell.

## For Reference Only

### Molitor Payweight 3015-165 [OSF]

Birth Date: 1-23-2015 Bull 18356291 Tattoo: 165

"Payweight 165" is a Basin Payweight 1682 son out of an ideal KG Solution 0018 female. She has excellent udder quality and is one of the best females in the herd. He has a solid CED at top 10% of the Angus breed and BW EPD Top 4%. He has Top 1% in \$W and Top 15% in Milk, Top 30% in YW. He is a gentle natured sire with Doc +15 and he produces moderate framed/wide based progeny that get up and gain! His 14 sons ratioed 104 on our 148 day Feed Test and he has our top (#1) gaining sire group for 2019. His daughters are easy-fleshing females with good udders.

## EPDS ARE COMPARABLE

EPDs can accurately be used to compare bulls in different herds within the breed. EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within herd ratios of contemporary progeny groups. They also factor out the management and environment differences that exist between herds. The Molitor Bulls selling have average EPDs that rank in the top 30% of the breed for CED and BW and top 20% for WW and YW. Many of the individual bulls selling will rank in the top 1% of the breed for some traits.

## For Reference Only

### Ellingson Chaps 4095

[AMF-CAF-D2F-DDF-M1F-NHF-OSF]

Birth Date: 3-1-2014

Bull \*17932714

Tattoo: 4095

Described by many astute cattle buyers as one of the best Resource sons in the Angus breed because of his calving ease. As a powerful curve bender with outstanding performance and moderate BW he is built like a tank, wide-topped, showing extra muscle shape throughout. He ranks Top 10% in BW, WW and \$W in the Angus breed. He has Doc +14 and Scrotal EPD in the Top 15% of the breed. Ellingson Chaps 4095 is an ABS Global Sire.

- If you are looking for a moderate framed bull that is extremely thick from one end to the other, this is the one. His adjusted Rib-eye measurement of 15.2 sq.cm. is 2nd highest among all sale bulls and he had an ADG Ratio of 117 for our 148 Day Feed Test. Maternal brothers have sold for \$6000 in 2016 and \$4000 in 2018.

## ★★ HOW THE BULLS ARE HANDLED ★★

The bulls and their dams are moved to large pastures in May and remain there until October. In October, they are weaned together in one large group. Then from November 15 to March 1, they are bunk fed at the Molitor headquarters with a high roughage diet set for a gain of 3 ¼ lbs per day. A final weight will be taken on about March 1 before they are run together on grass in one large pasture and remain there until sale day. Yearling weights were taken on Feb 5 and Feb 6 2019.

- A 3/4 brother to Lots 18, 21, and 22. Chaps worked very well on our LD Emblazon 999 daughters. ADG Ratio of 106.

## RETAINED INTEREST EXPLANATION

We will be retaining a revenue sharing interest in several bulls that sell. This means that you will receive full possession and salvage value in the bull. Our retained interest gives us the right to use the bull by AI and share in semen sales of the bull. Semen will be collected at your convenience and all fees associated with collection will be shared by interest owners. We feel that bulls you purchase from us and are later so-called discovered by the industry will be an economic windfall deserved by the bull owners. If we have not retained an interest in these bulls at the time of initial sale, we may be willing to buy back an interest in those bulls, on your terms.

- With WW and YW EPDs in the top 2% of the breed, he is 5th high for WW and 4th high for YW EPDs among the sale bulls. His Docility is 5th high and \$B is 7th high. REA Ratio 107.

Because of the multitude of cattle media and information we receive every day, it is easy to over complicate the cattle business. We try not to forget the basics: "Raise trouble free cattle that calve easy and produce a big calf." Sounds pretty simple but "raising trouble free cattle" encompasses a large number of factors. One of those factors, at Molitor Angus, we have a reputation for having gentle and easy handling cattle. Environmental conditions may contribute to these traits as we try to handle our cattle with the least amount of stress as possible with a minimum number of times through the chute. Docility genetics play a role but we still must choose genetics that produce vigorous calves at birth for greater survival rates under adverse weather conditions.

+27	+58	+027	+61.83	+120.18	+18.85	+169.15			

- A high performance growth bull that Ranks in the top 1% for WW and YW EPDs. His REA Ratio of 115 was high among the Whitlock sons. ADG Ratio 111. Also notice his weaning Ratio and yearling weight Ratios are 111.

## UNDERSTANDING PERFORMANCE RATIOS

Being a performance herd, ratios are very important in evaluating our cattle. 205-day and 365-day adjusted weights on an individual animal have very little meaning in a herd unless that animal's weights can be compared to the other individuals in the calf crop. Ratios do that comparison. For example: a ratio of 100 is average, 105 is 5% above average, 95 is 5% below average.

*The yearling bulls have average 205-day adj. Weights of 640 lbs.*

*Therefore:*

$$WR\ 95 = (.95 \times 640) = 608\# \ 205\ ADJ.$$

$$WR\ 100 = 640\# \ 205\ ADJ.\ WT$$

$$WR\ 102 = (1.02 \times 640) = 653\#$$

$$WR\ 105 = (1.05 \times 640) = 672\#$$

$$WR\ 110 = (1.10 \times 640) = 704\#$$

$$WR\ 120 = (1.20 \times 640) = 768\#$$

*The Yearling bulls have average 365-day adj. weights of 1162 lbs.*

*Therefore:*

$$WR\ 95 = (.95 \times 1162) = 1104\# \ 365\ ADJ.\ WT.$$

$$WR\ 100 = 1162\# \ 365\ ADJ.\ WT$$

$$WR\ 102 = (1.02 \times 1162) = 1185\#$$

$$WR\ 105 = (1.05 \times 1162) = 1220\#$$

$$WR\ 110 = (1.10 \times 1162) = 1278\#$$

$$WR\ 120 = (1.20 \times 1162) = 1394\#$$

It should be noted that lower than average ratios on an animal does not necessarily mean that he or she is inferior. Instead, it may be that the animal's true growth performance was robbed, so to speak, by factors such as health problems. Also, the amount of fill that an animal has on weigh dates will cause a slight difference for comparison between individuals. However, we feel that individuals with consistently high ratios are quite superior because they have been exposed to the same adverse circumstances as their mates but have excelled above the rest.

# SONS OF BALDRIDGE COMPASS C041

- Like this bull, most of these Compass sons are out of 2 year old dams. Notice how similar their EPD packages are having high calving ease and growth traits.

To provide our customers with the most accurate and meaningful data on our bulls, we continue to measure data on our bulls, we continue to measure all the traits that we can in this operation. Also this year, all the bulls have HD 50K DNA tests to enhance their EPDs. After all those measurements have been completed, we have 47 bulls with minus BW EPDs and 83 bulls at or over + 100 for YW EPD. Our sale bulls average in the top 30% of the breed for Calving Ease and Low Birth Weight and Top 20% for Growth Performance.

## JOURNEY TO MONTANA

In 2018, we made our annual journey to Montana in early spring to view the 701 Angus bulls entered in the 2018 Midland Bull Test near Columbus, MT and witness the sale of the top finishers from 200 sire groups represented from herds across the USA. The trip also included the Hinman Angus Sale featuring the progeny of HA Prime Cut 4493. Also in the area are the Genex, World West and Origin Herd Studs where we view and select the finest A-I Herd Sires for our Angus Customers.

But this year, the sale at Midland of a KG Solution 0018 son out of the dam, Molitor FA Blackbird 878-046 was a special event to see. This bull calf sold in-dam (1-10-18) to Dix Angus Ranch as part of an annual private treaty sale of all our 6 year old cows. That bull calf was born 1-27-2018 and delivered to Midland in October 2018 as part of the 12 Head Dix consignment.

That bull, DAR Resolution R106, #18900706 out of the Molitor dam ended up being the Top Indexing bull among those 701 Angus Bulls and was the Lot 1 bull to lead off the 471 Angus Bulls to sell that day. The buyer was the well-known Schurr Bros. Ranch in Farnam, Nebraska.

We appreciate the dedication of Dix Angus Ranch near Stockton, KS for the pursuit of raising top notch Angus Cattle and recognizing the performance breeding traits of the Molitor Herd.

## BEFORE YOU DECIDE WHETHER OR NOT TO USE YEARLING BULLS, CONSIDER THESE FACTS:

- You're Buying the Very Best!**  
*Yearling bulls haven't been picked over and the yearling bulls offered are the very best from their calf crop at both weaning and yearling time. If they are not the best, they would not be offered to you now.*
- Younger Bulls are Easier on Heifers!**  
*And they're easier on cows and each other, too. Handled and used properly, yearling bulls will work longer for you.*
- You can Usually Buy Them Cheaper!**  
*Yearling bulls often sell for 30 percent less in total dollars than comparable quality two-year-old bulls. PLUS you can develop them as YOU see fit.*
- Yearling Bulls May Not be for Everyone!**  
*But, if you can adjust your program to yearling ANGUS bulls, we can offer you better quality bulls, with the same genetics to sire more pounds for less money and improve your profit potential. Think about it in terms of dollars and sense.*

# SONS OF HARB PLAYBOY 581 JH

**For Reference Only**

## HARB Playboy 581 JH

Birth Date: 2-17-2015

Bull 18234809

Tattoo: 581

- Playboy was the 3rd high-selling bull at Midland Bull Test in 2016. HARB IDOL 112, Playboy's sire, was a high-selling bull at Midland in 2013 and a flush brother to the dam of Playboy was the high-selling bull in 2009. Playboy is a herd bull favorite here at the Molitor Angus Ranch for his powerful yet gentle nature who has impressive muscle pattern, thickness, breeding agility with heifers and cows and high docility. He ranks Top 25% on Doc at +21. He is Top 10% for CED and Top 20% on Marbling. His sons posted an average ratio of 108 for % IMF. We stand firmly behind the majesty of this magnificent herd bull.

- The only son of Charlo in the sale. His dam is a 2 year old daughter of Black Granite. CED in the top 10% of the breed. Top 15% for WW and top 25% for YW. % IMF Ratio of 110.

## ANGUS SIRE ALLIANCE PROGRAM

Many of the sires we are using in the Molitor Herd are proven graduates of the Angus Sire Alliance Program. This program was initiated by Circle A Angus Ranch in 1996 to objectively measure commercial performance and real world value from birth-to-harvest. The program pioneered the use of selection indexes in the beef industry and remains the most comprehensive source of feedlot profit, efficiency and maternal performance. The feedlot segment of the program is the longest running program of its kind with progeny individually measured for feed intake and feed efficiency since 1998. Today the Sire Alliance and Circle A Ranch are the largest contributors to the American Angus Association carcass data base. The typical Sire Alliance graduate has 30 steer progeny evaluated for carcass merit which by itself generates higher reliability and accuracy levels that 90 % of the bulls that qualify for the Main Sire Summary listing. Beyond performance, carcass value and efficiency, daughters of Sire Alliance bulls are monitored for maternal function and profitability. The Sire Alliance Maternal Index incorporates daughter productivity and fertility data including Heifer Pregnancy and Stayability.

Watch & bid online for FREE at

**DVAuction**  
Broadcasting Real-Time Auctions

Can't make the sale? Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

**Proxy Bidding**-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

**Having troubles?** During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

## THE PATHFINDER OPPORTUNITY

Molitor Angus has one of the largest numbers of Pathfinder cows as any herd in Kansas. Those females excel in fertility and progeny performance.

To be a Pathfinder, a female has to have the opportunity to reach that status. At Molitor Angus, every female starts out with the opportunity. Starting about April 10th, we start breeding our replacement heifers on a natural cycle basis for about 24 days then give Lutalyse to those not seen in heat. About May 20th, all heifers are put to grass with a pasture bull.

Two-year-old cows with their first calves are all put to grass in mid-April for natural service. This group of 80 to 100 head are used to help prove our young herd sires by getting at least 15 progeny each from those bulls.

Three-year-old and older cows that calve before about February 25th are AI'd on a natural cycle basis for about 30 days and then put to pasture.

At Molitor Angus, genetics do play a role in developing a Pathfinder cow but you must give that cow the opportunity to show her potential.

### Thank The Helpers

It takes a lot of help for an operation this size and we thank our employees Kole Kernohan, Andy Kostner, Leroy Hageman, Brandy Nulik, and Joni Brack. Specialize Service individuals we want to recognize are: Larry Bush (vet services), Joe Hite (clipping and branding), and Jerry Thurman (feeding systems). Also, I appreciate the assistance throughout the year of my sisters and their husbands: Doug Walbridge, Bud Oak, Mike Strothman, Mike O'Brock and Mike Dailey.

Thanks so much,  
Mike Molitor

The Lumber Yard Steakhouse is owned by a subdivision of the Molitor Angus Ranch since May of 2010. The restaurant's house specialty is STEAK, especially the 16 ounce Doc's Rib eye. The rib eye steaks are CAB (Certified Angus Beef). Come and enjoy the food and hospitality in a family atmosphere restaurant.

Pick up your purchased livestock by Saturday, Saturday March 23, 2019 and enjoy a \$50.00 gift certificate per head to the Lumber Yard Steakhouse. Individuals that purchase 3 or more BULLS will enjoy a \$75.00 gift certificate per head if picked up by the 3-23-2019 deadline.

Kole Kernohan Family (Ranch Manager)

### WHAT MAKES THE MOLITOR ANGUS HERD UNIQUE?

The herd is patterned after our vision  
of the ideal registered Angus.

#### Meaning:

1. Sound, correct footed, and long bodied with enough volume to convert roughage, conducive to our environment.
2. The females are feminine, but powerful enough to produce masculine bulls.
3. The bulls are masculine, thick, and muscular, but still refine fronted and long necked for calving ease.
