### SALE LOCATION:

Molitor Angus Ranch, 5 miles North, 2½ miles West of Zenda or 9 miles West, 9 miles South, 2½ West of Kingman – See map on back cover.

### TRANSPORTATION:

Wichita Municipal Airport serves many major airlines, also the Kingman Airport has facilities for private airplanes. We will be happy to meet any flight on request.

### SALES STAFF:

Col. Jerry Lehmann, Auctioneer.....	573-474-7230
	(cell) 573-999-4759
Jeff Mafi, <i>Angus Journal</i> .....	816-344-4266
Tami McIntosh, DVAuction.....	402-316-5460
Jeff Hallowell, <i>OK Stock Exchange</i> .....	405-840-3915
Angus Hall of Fame .....	816-532-0811
Anne Lampe, <i>Kansas Angus News</i> .....	620-874-4273
Dakota Ferguson, <i>Kansas Stockman</i> .....	785-893-1684

### SALE HEADQUARTERS:

Copa Motel, east edge of Kingman, Kan., 1113 E. Hwy 54, 620-532-3118 or Welcome Inn Motel, 1101 E. Hwy 54, Kingman, 620-532-3144.  
Call hotels for reservations or call Richard Molitor 620-243-6335.

### ASSOCIATION REPRESENTATIVES:

Jeff Mafi .....	Regional Manager, American Angus Association
Anne Lampe .....	Secretary, Kansas Angus Association
Clint Woodrow .....	President, Kansas Angus Association
John McCurry .....	Past President, Kansas Angus Association

### GENERAL INFORMATION:

**INSPECTION OF CATTLE:** All sale cattle will be available for your inspection at the ranch. All cattle are freeze branded.

**DNA INFORMATION:** All cattle sell free of known genetic defects. A supplement sheet will be available at the sale for updated performance data. All bulls and females have been HD50K Tested.

**HERD HEALTH:** All cattle will be accompanied with proper health certificates. Cattle selling to surrounding states that require additional tests will be held and shipment will be scheduled later. All bulls will be semen tested and scrotal measured. Also, bulls and breeding-age females will be vaccinated with Preg Guard Gold FP10 and Poured. All cattle have PI negative tests. Safeguard wormer is used twice a year. All yearling cattle have a Feb 2021 treatment with Valbazen wormer.

**TERMS AND CONDITIONS:** The terms of the sale are cash or check and all settlements must be made at the close of the auction. All animals are 100% guaranteed in accordance with the rules and regulations set forth by the American Angus Association. A copy of the Angus Association rules will be in the office on sale day. Announcements on sale day take precedence over printed material. All persons who attend the sale do so at their own risk. Molitor Angus assumes no responsibility, legal or otherwise, for their safety or the behavior of the animals.

**INSURANCE:** Insurance will be available at the purchaser's option.

**DELIVERY:** Pick up your purchased livestock by Saturday, March 27, 2021, and enjoy a \$50.00 gift certificate per head to the Lumber Yard Steakhouse in Zenda, KS. For more details, see page 35. We will be happy to assist the delivery arrangements. We do offer free delivery of 3 or more lots to one location within 300 miles. Shipment is at buyer's own risk, so we suggest you insure your purchases.

**LUNCH:** A complimentary lunch will be served at 11:00 a.m.

**All announcements from the Auction Box will take precedence over the information in the Sale Book.**

**PLEASE BRING THIS SALE BOOK WITH YOU TO THE SALE.**

### EXPLANATION OF EPD CODES

**CALVING EASE DIRECT (CED),** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**BIRTH WEIGHT EPD (BW),** expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

- Bulls with EPDs less than +2.0 are recommended for use on heifers. You may still have some calving difficulty, but as the value for EPD become lower, so should your calving difficulty due to birth weight become less.
- Bulls with EPDs between +2.0 and +4.0 can be used on heifers, but close supervision and management should be followed.
- Bulls with EPDs over +4.0 can safely be used on cows but are not recommended for use on heifers.

**WEANING WEIGHT EPD (WW),** expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**YEARLING WEIGHT EPD (YW),** expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**MATERNAL MILK EPD (MILK),** is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mother ability.

**SCROTAL CIRCUMFERENCE EPD (SC),** expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**DOCILITY (DOC),** is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**CARCASS WEIGHT (CW),** expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**MARBLING (MARB),** is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**RIBEYE AREA (RE),** expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**HEIFER PREGNANCY (HP),** is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

**CALVING EASE MATERNAL (CEM),** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

### PERFORMANCE CODES

**BW -** Actual Birth Weight in Pounds.

**WR -** Weaning Weight Ratio comparing all animals weaned in a contemporary group. 100 is average.

**YR -** Yearling Weight Ratio comparing all animals in a contemporary group. 100 is average.

**NR -** Nursing Ratio - weaning ratio average of the dam's progeny.

**# -** This symbol used with a pedigree means that particular animal is a Pathfinder and meets a certain set of strict standards set forth by the American Angus Association.

The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early performance of the offspring. In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

**ANGUS MEDIA** Visit the Angus Journal Web site, [www.angus.org](http://www.angus.org) and view this sale book online. References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®. EPDs contained in the original printed version of this sale book were current as of the printing date. Digital versions of this sale book online at [angus.org](http://angus.org) will have EPDs updated every Friday. Any PDFs downloaded from the website will contain EPDs current as of the date of the download.

# WELCOME TO MOLITOR ANGUS RANCH

## MOLITOR ANGUS RANCH

11558 SW 90th St. Zenda, Kansas 67159  
(620) 243-6335 • Email: molangus@onlinezenda.net  
Mobile: (620) 243-3081

Dear Angus Friends,

Welcome to our 42nd Annual Production Sale. Our family ranch is a "hands on" operation and all the sale cattle have been raised and grown on our land. The day-to-day feeding of our cattle allows us to monitor their development from birth to sale day.

For the bulls, our feeding system gives them the opportunity to compete against each other and exhibit their superior gain potential. Past customers indicate their satisfaction with the condition and soundness of our sale bulls. All bulls are semen checked, HD50K DNA tested and ready for service.

This year's quality group of open yearling females selling were selected because they are some of the best breeding genetics in the herd. Several are out of Pathfinder Cows and are very special. We sell replacement heifers that represent the sire groups in our calf crop. These females sell with HD50K DNA tests and are in good healthy breeding condition. OCV and OPEN.

We hope you appreciate the entire offering represented in this sale. Be confident that you are buying cattle that are fully guaranteed by a program that has 68 years of experience in the Angus business.

Let us know if we can be of assistance in helping you with your selection. We greatly appreciate your interest in our family cattle operation. We are appreciative of all the support of our loyal customers and look forward to seeing everyone on sale day to celebrate our 69th year.

Mike Molitor & Molitor Family

The Molitors - Debbie, Nancy, Lisa, Mike, Marsha, Connie, and Sandy with parents Richard and Angela

## CATTLE SELL THROUGH THE SALE RING. VIDEOS AVAILABLE OF SALE LOTS AFTER MARCH 10

**All Cattle sold are free of  
known genetic defects.**

### PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to Mike Molitor or to the auctioneer, sales staff or representatives. If you would like to discuss the sale offering, call us (preferably several days before the sale), and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and pay only the bid price established by the auction. Bids are handled in confidence with a Satisfaction Guarantee on all orders.

### 42ND ANNUAL PRODUCTION SALE!

Dear Cattlemen,

Plan now to celebrate the Molitor Angus Ranch 42nd Annual Production Sale with the Molitor family on Saturday, March 20, 2021. Selling will be approximately 100 bulls and 40 heifers. The sires include Werner Flat Top 4136, Cherry Creek Land Grant, Barstow Bankroll, Ferguson Trailblazer 239E, HARB Playboy 581 JH, Molitor Payweight 3015-165, LD Bankroll 704, BPF Bankroll 731, TH Primecut 4917, Bluegrass Aviator 700, KG Solution 0018, and more.

The Molitor family has been breeding Angus cattle for 69 years since 1952. In 2014, they were recognized as the Certified Angus Beef Seedstock Commitment of Excellence Award Winner. The cattle excel in a combination of performance and calving-ease with gentle disposition. The tradition continues.

Plan now to be on hand to celebrate the lengthy tradition of the Molitor Angus program. Please don't hesitate to call on us at the American Angus Hall of Fame if we can be of assistance with your selection decisions. We are here to serve.

Sincerely,

Tom Burke  
(816) 853-2697

Kurt Schaff  
(816) 520-6447

Watch & bid online for FREE at

**DVAuction**  
Broadcasting Real-Time Auctions

## Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at [www.dvauction.com](http://www.dvauction.com).
- Click on the "Register" tab.
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply."
- Complete the process by filling out the Banking & Lending information requested.
- Be sure to include a personal contact at your bank. We will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 474-5557.
- Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale, contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email [support@dvauction.com](mailto:support@dvauction.com).

Proxy Bidding: If you can't access a computer during the sale, you can also place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears, there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

## GUARANTEE

In addition to the below stated guarantee, all cattle sell under the Suggested Sale Terms and Conditions of the American Angus Association.

### BULLS:

1. All bulls selling are guaranteed to be breeders for the first breeding season.

Breeding season is defined as the 90-day period following the first turnout of the bulls. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm/ranch of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to a 6 month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of 6 months the seller is unable to prove that the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price.

The return of the full purchase price shall in any case be deemed full satisfaction and settlement.

2. This breeding guarantee on the bulls by the seller will apply with the exception of: (a) injury or disease occurring after the sale, (b) gross negligence or willful misconduct on the part of the buyer.
3. However, all bulls selling for \$3,500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. Breeding injury is defined as injury to penis or preputial tear with inability to extend. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull, less \$10 per day the bull has been in use since first turnout. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Guarantee ends August 31, 2021.

### FEMALES:

1. All yearling females sell as open and ready to breed.
2. Fall calving females are safe in calf unless otherwise noted on sale day.
3. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to six months trial following the return of the animals in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value, or if the buyer prefers, credit toward one female will be given in the following year's sale.
4. All claims for adjustment or refund on the females must be made by December 15, 2021. Mortality insurance on the cattle will be available at the settlement table on sale day.

### What is an EPD?

The Expected Progeny Difference (EPD) is the increase or decrease in performance for a given trait that you can expect from the progeny of an animal compared to breed average. EPDs are expressed in pounds as a plus (+) or minus (-) figure.

### What makes EPDs so valuable?

EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within-herd ratios of contemporary progeny groups. They also factor out the management and environmental differences that may exist between herds. EPDs can accurately be used to compare bulls in different herds within the breed. It is important to select for EPD traits that match your operational goals. If you are looking for a bull to use on virgin heifers, birth weight EPD is a primary consideration. If you keep or sell replacement heifers, milk EPD is a major factor. If your calves are sold at weaning time with no replacement females retained, then weaning EPD is of vital importance. Those of you who background your calves should concentrate on yearling weight EPD. Many times a balance in all traits is required, depending on your individual situation.

It is important to understand that EPDs are accompanied by accuracy values and may fluctuate up or down as accuracy increases.

## 2020 USPB (MOLITOR 38 STEER FEEDLOT RESULT)

In the Angus breed we have EPDs that have high accuracies but once in awhile we need a real-world trial to verify some of them. In 2020, we fed 38 head of steers from the Molitor Registered Herd at Pratt Feeders. The balance of the steers in the feeding pen of 84 head were purchased from Terry Brown of Wilmore, Kansas, with many of them having Molitor breeding influence. The steers did very well with the whole pen averaging \$104.37 a head premium on the USPB grid. Only the 38-home raised Molitor steers are included in the summary below. **\*100% Choice or higher with 79.33% CAB\***

## AMERICAN ANGUS ASSOCIATION \$VALUE INDEXES

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

### ★★ 40 BULL CLUB ★★

## FOR REFERENCE ONLY

### FERGUSON TRAILBLAZER 239E

[AMF-CAF-DZF-DDF-MIF-NHF-OHF-QSF-RDF]

BD: 02-18-2017

Bull \*18996007

Tattoo: 239E

This Select Sires bull became a "must use" sire because his sire VAR Discovery 2240, is an outcross to our genetics, but his now Pathfinder Dam was very familiar as we sold her in our 2014 sale to Spring Valley Farm near Agra, KS. Trailblazer is a great breeding bull and true to his EPD Profile. We used him on several different bloodlines but he was able to project his genetic influence on all bloodlines and make a great improvement in one generation. We currently have another impressive set of calves on the ground with no calving issues on heifers and cows. Calves are born light with tremendous and consistent growth.

## PERFORMANCE DATA AS AN AID IN LIVESTOCK SELECTION...

Molitor Angus is dedicated to providing honest and accurate performance data to their customers. All of the EPDs listed in this sale book are official American Angus Association EPDs

calculated by Angus Herd Improvement Records (AHIR) and are current as of the date of this sale book printing. Scrotal measurements will be on the performance update sheet available sale day.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs. Better characterization of genetics for difficult-to-measure performance traits such as carcass traits, maternal traits and feed efficiency.

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered through weekly evaluation at [www.angus.org](http://www.angus.org).

Trait	Progeny Equivalent	Trait	Progeny Equivalent

Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

[www.angus.org](http://www.angus.org)

## BEFORE YOU DECIDE WHETHER OR NOT TO USE YEARLING BULLS, CONSIDER THESE FACTS:

### • You're Buying the Very Best!

Yearling bulls haven't been picked over and the yearling bulls offered are the very best from their calf crop at both weaning and yearling time. If they are not the best, they would not be offered to you now.

### • Younger Bulls are Easier on Heifers!

And they're easier on cows and each other, too. Handled and used properly, yearling bulls will work longer for you.

### • You Can Usually Buy Them Cheaper!

Yearling bulls often sell for 30 percent less in total dollars than comparable quality two-year-old bulls. PLUS you can develop them as YOU see fit.

### • Yearling Bulls May Not be for Everyone!

But, if you can adjust your program to yearling ANGUS bulls, we can offer you better quality bulls, with the same genetics to sire more pounds for less money and improve your profit potential. Think about it in terms of dollars and sense.

This bull is a beautiful patterned bull that sorts himself to the top in terms of EPD rankings and conformation. The 2 year old dam is sired by the popular Baldridge Compass C041 with his dam being the great Baldridge Isabel Y69. This bull selling ranks among the sale bulls in the Top 5 or higher for 8 EPDs. WW (5th), YW (3rd), CW (2nd), \$ Grid (2nd), Marb (2nd), \$Weaning (4th), \$Beef (2nd), and \$C (2nd). In the Angus breed, he ranks in the top 10% or higher for all these traits. This herd bull prospect is one of the first Trailblazer sons to sell in the country. Selling 2/3 interest and full possession.

Sired by one of the new dominant sires in the Angus breed, Ferguson Trailblazer 239 E. The Pathfinder Dam has a WR 107 on 4 calves so the bloodlines contribute great fertility, maternal traits, growth and carcass marbling into this valuable bull package. Among the sale bulls, he ranks in the Top 5 or better for YW, Scrotal, \$Grid, HP and Marbling. In the Angus breed, he ranks in the Top 10% for those traits, plus CEM and BW.

Among the Trailblazer sons, this bull was the high gainer in our 139 Day Feed Test with a gain ratio of 108. He ranks in the Top 20% of the breed for CED, Scrotal and Docility. A 3/4 brother to Lot 3.

## SALE ORDER

In an effort to provide our customers with an equal opportunity to purchase the same quality bulls from the start of the sale to the finish, we have implemented a unique sale order approach. After a few highlight bulls sell, most of the bulls in this sale will be sold in sire groupings to provide the same quality bulls from the start of the sale to the finish. This will allow our customers who purchase bulls late in the sale an equal opportunity to bid on bulls of the same caliber as in the early portion of the sale, each time a new sire grouping starts. This also assists customers who are trying to select groups of brothers for a more uniform and consistent calf crop. To assist our customers planning their bidding and buying decisions, the sale order for each sire group will be available sale day as well as the order in which the sire groupings will sell.

## FOR REFERENCE ONLY

### BARSTOW BANKROLL B73

[AMF-CAF-DZF-DDF-MIF-NHF-OHF-OSF-RDF]

BD: 02-14-2014

Bull #18036327

Tattoo: B73

We became interested in using this bull because of his son's outstanding performance on test; notably at the Midland Bull Test in Montana and the Luddington Ranch in Oklahoma. The dam's sire, CAR Efficient 534, was used in our herd for many years with great success, and the dam traces to the South Haven, KS, breeders, Hunt Angus. The Bankroll progeny have all been good, and our first daughters in production are front pasture phenotypes. His sons were our 3rd high gaining sire group with an average gain of 3.67 lbs. per day on our 139 day Feed Test with a high roughage diet. Select Sires Bull.

Bull \*18094501

Tattoo: 4136

Using this sire was an easy decision as we have been pleased with the progeny and performance of his sire, Connealy Black Granite. After researching the dam, Werner Lady 0304, we really became excited about using him and now have his first daughters in production and they have similar traits to the great Werner Lady 0304. In this herd, "Flat Top" has done everything we expected of him. His sons were our 2nd high gaining sire group with an average gain of 3.68 lbs. per day for 15 sons. Select Sires Bull.

A 3/4 brother to Lot 32 that shows similar high values for Calving Ease and Growth. He ranks in the Top 20% of the breed for CED, BW, YW, Scrotal, Docility and \$Wean.

## EPDS ARE COMPARABLE

EPDs can accurately be used to compare bulls in different herds within the breed. EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within herd ratios of contemporary progeny groups. They also factor out the management and environment differences that exist between herds. The Molitor Bulls selling have average EPDs that rank in the top 25% of the breed for CED and BW and top 30% for WW and YW. Many of the individual bulls selling will rank in the top 1% of the breed for some traits.

	CED	BW	WW	YW	MILK	SC	DOC

## ★★ HOW THE BULLS ARE HANDLED ★★

The bulls and their dams are moved to large pastures in May and remain there until October. In October, they are weaned together in one large group. Then from November 15 to March 1, they are bunk fed at the Molitor headquarters with a high roughage diet set for a gain of 3.0 lbs. per day. A final weight will be taken on about March 1 before they are run together on grass in one large pasture and remain there until sale day. Yearling weights were taken on Feb 1 and Feb 2, 2021. In an effort to maximize bull health and foot soundness, the bulls received limited supplement this summer before weaning weights were taken in September. At weaning, we were careful to limit their grain intake and have continued this policy and the total bull health has been excellent.

- A bull with lots of power for growth and displays a strong stature for frame and length. Ranks in the Top 20% of the breed for WW and YW. The dam is a highly productive daughter of Black Granite, with Final Answer and In Focus in her immediate pedigree. ADG Ratio 111.

### CHERRY CREEK LAND GRANT

[AMF-CAF-DZF-DDF-MIF-NHF-OHF-OSF]

BD: 08-22-2016 Bull 18863391 Tattoo: D114

- This sire came on our radar as his sire, KCF Bennett Homestead, has been featured by ABS Global for several years as a great maternal sire. The dam is sired by KG Solution 0018, so we were confident in the overall breeding predictability of Cherry Creek Land Grant. Note that one of his first sons was the 3rd high selling bull in the Spring 2020 Connealy Angus Sale for \$60,000 to ST Genetics in Texas. We have another set of Land Grant calves on the ground, and we appreciate his great genetic influence. ABS Global Bull.

• We discovered KG Solution 0018 at the Genex Stud in Montana almost 9 years ago, and his genetics continue to be top notch herd improvers. His genetic profile continues to improve every year and Ranks in the Top 25% of the breed for both calving ease and growth. We have been most impressed by the phenotype of his progeny and his ability to put a straight top and attractive look in his offspring. Notice also the number of Pathfinder Cows in our herd that are sired by KG Solution 0018. Genex Bull.

A medium frame bull that is designed for calving ease traits and Reducing Mature Weight and Height. In the Angus breed, he is in the Top 10% for CED, BW, CEM and Reduced MW and MH. ADG Ratio 110.

## FOR REFERENCE ONLY

## MOLITOR PAYWEIGHT 3015-165

BD: 01-23-2015 Bull 18356291 Tattoo: 165

Molitor Payweight 3015-165 has made an enormous impact in the Molitor herd. His sire is well known; and his dam was one of the most ideal females that has ever been in the herd, and she traces back to generations of great cows. His first set of daughters have already made an influence in the sale cattle that sell. For years, his sons were the lead off Lots in our catalog and sale; even ahead of the AI sire progeny. This year, his sons were the high gaining sire group overall on our 139 day Feed Test and gained 3.70 lbs per day with 11 sons in that group.

• His Pathfinder Dam with a WR 105 on 5 calves continues to excel in production in the Molitor herd. The daughters of this bull should be great replacements to build a herd of easy fleshing, thick muscled cows with correct feet and legs.

### MEANING:

- Sound, correct footed, and long bodied with enough volume to convert roughage, conducive to our environment.
- The females are feminine, but powerful enough to produce masculine bulls.
- The bulls are masculine, thick, and muscular, but still refine fronted and long necked for calving ease.

### HARB PLAYBOY 581 JH

BD: 02-17-2015 Bull \*18234809 Tattoo: 581

• HARB Playboy 581 JH is a favorite for his gentle powerful nature and easy going style combining his docility and impressive muscle pattern and thickness. His bloodlines are traditional and highly proven Montana genetics, which emphasize maternal traits and correctness in their feet and leg structure. Ancestors of Playboy were high selling bulls at the 2013 and 2009 Midland Bull Tests. He was the 3rd high selling bull at Midland in 2016. He posts high marks for CED, Docility, Marbling, and \$EN. In the sale you will notice that his progeny have high values for \$EN, which translates to reduced mature weight and mature height with economic savings in your cow herd. 80 DNA Genomic Progeny on record.

We have seen HA Prime Cut 4493 at the Genex Stud in Montana, and he is a massive beef bull. At the Hinman Angus Ranch near Malta, Montana, we witnessed some of the first sons of Prime Cut to sell, and they were an impressive group of popular and high selling bulls. That same year we purchased a son of Prime Cut at the Midland Bull Test, where he compiled an impressive record. That bull is Reference Q, TH Prime Cut 4917.

[AMF-CAF-DZF-DDF-MIF-NHF-OHF-OSF]

BD: 01-30-2012

Bull #\*17264774

Tattoo: 542

• Aviator was a mainstay resident of the ORigen Stud near Harding, MT, where he was admired by all that have seen him. He is a bull that offers a unique combination of balancing calving ease with muscle and phenotype that displays great feet and leg structure. He is believed to be a powerful gene marker for the Leptin gene that improves efficiency, appetite, marbling and maternal strength. That high marbling ability may have contributed to the two Prime Grade steers produced by his son, Bluegrass Aviator 700, who is Reference Sire R.

• The dam has a consistent history of producing a line of Top performing daughters. Two daughters are in the herd including a full sister to this female. Among the sale females, she Ranks in the Top 5 for WW, \$C and \$Maternal. She is packed for growth and Ranks in the Top 20% of the breed for WW and YW. OCV and OPEN.

## THE PATHFINDER OPPORTUNITY

Molitor Angus has one of the largest numbers of Pathfinder Cows as any herd in Kansas. Those females excel in fertility and progeny performance.

To be a Pathfinder, a female has to have the opportunity to reach that status. At Molitor Angus, every female starts out with the opportunity. Starting about April 10th, we start breeding our replacement heifers on a natural cycle basis for about 24 days then give Lutalyse to those not seen in heat. About May 20th, all heifers are put to grass with a pasture bull.

Two-year-old cows with their first calves are all put to grass in mid-April for natural service. This group of 80 to 100 head are used to help prove our young herd sires by getting at least 15 progeny each from those bulls.

Three-year-old and older cows that calve before about February 25th are AI'd on a natural cycle basis for about 30 days and then put to pasture.

At Molitor Angus, genetics do play a role in developing a Pathfinder Cow but you must give that cow the opportunity to show her potential.

The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early calving, followed by regularity of calving and above-average performance of the offspring. In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

• We saw Intrigue at the Stud and nicknamed him "soft eyes" because of his truly gentle nature coming in at a whopping +30 Docility at Top 4% of the Angus breed. He has a CED of Top 4% making him a sleep at night, wonderful heifer bull. BW at Top 10%. He hails from one of the great cows and cow lines in the Angus breed, Buford Elba 9000. Intrigue offers a spectacular combination of power and good looks. He is making his mark in the commercial market where cow power and pounds matter. We were impressed when we went to the ranch to see his full sisters at Reisig Cattle Ranch in Lewistown, Montana.

• Payweight 1682 is a high volume, easy fleshing bull that cattlemen came to see at ORigen as he has been one of the highest demand sires for most of a decade. Few calving-ease bulls in the Angus history have offered the extreme body mass and depth of body as his "1682" trademark. This bull has both Maternal profit and Top feed efficiency, for total profit. He sets the pace with sale toppers from coast to coast because of his high demand genetics. A docile bull at +24 Doc at Top 20%, and CED of +7, with WW and YW at Top 25%, and high performance Milk at +32, he is a proven winner. Basin Payweight is an ABS Global Sire.

His dam is a 3/4 sister to LD Capitalist 316, with his great grandam being the famous LD Dixie Erica 2053.

### Thank The Helpers

It takes a lot of help for an operation this size and we thank our employees: Adam Fisher, Andy Kostner, Gary Novak, Brandy Nulik, Delia Swingle, Ben Oak and harvest help Jeff Heatherman & Ed Huelskamp.

Specialized Service Individuals we want to recognize are: Dr. Larry Bush (Vet Services), Joe Hite (clipping and branding), Western Feed Mills, and Zenda Co-op (feeding systems).

Also, I appreciate the assistance throughout the year of my sisters: Sandy, Connie, Marsha, Debbie, Nancy, and Lisa. Their husbands' tireless support: Doug Walbridge, Bud Oak, Mike Strothman, Mike O'Brock & Mike Dailey.

Thanks so much,  
Mike Molitor

Sun. & Mon.

The Lumber Yard Steakhouse is owned by a subdivision of the Molitor Angus Ranch since May of 2010. The restaurant's house specialty is STEAK, especially the 16 ounce Doc's Rib eye. The rib eye steaks are CAB (Certified Angus Beef). Come and enjoy the food and hospitality in a family atmosphere restaurant.

Pick up your purchased livestock by Saturday, March 27, 2021 and enjoy a \$50.00 gift certificate per head to the Lumber Yard Steakhouse. Individuals that purchase 3 or more BULLS will enjoy a \$75.00 gift certificate per head if picked up by the 3-27-2021 deadline.
